

# PASCAL

## UK Patented PASCAL hinge

The patented PASCAL hinge is an innovative solution for single or 2 wings gates, or even for large industrial doors, with the following advantages:

- Easy installation
- No large drillings in the columns
- Quick and simple on site adjustment, feasible even by one man alone
- Reduced dimensions between column and wall, thus maximizing the light available
- No clearance thanks to the new adjustment and fixing device
- Equipped with a lubricator for periodic maintenance and potential noise prevention
