

MC300/400I - SWING

Simple Safe and Sturdy

Gear-motors for outdoor use, for the automation of swing gates with wings up to 2 meters and installation kit. Easy guided installation, with adjustable accessories and brackets.

It is designed by using a diecasting structure made of quality aluminum, stainless steel, bronze and steel. Its fluid-grease lubrication system, the polyester powder-paint, its built-in heat guard and its drive with self-lubricating worm screw ensure a long-lasting working life in any weather condition with no need of periodical adjustments.

The locked version ensures the gate locking without an electric-lock, and it comes with a release key. The perfect integration of its components ensures the greatest quietness.

TECHNICAL FEATURES

| | |
|---------------------|-----------------------|
| Power supply | 230V ~ 50Hz - 1 phase |
| Capacitor | 8 Mf |
| Motor power | 280 watt |
| Absorption | 1,2—1,7 A |
| Structure | Aluminium |
| Working temperature | -20 +70 |
| Stroke | 400 mm. |
| Time | 21 SEC. |
| Weight wing | 250kg. |
| Reduction ratio | 1:27 |
| Lenght wing | 2 mt. |
